PROBLEM

Current Scenario: In India, approximately 145,012 schools have grade configurations that deviate from the standard categories defined by the Ministry of Education under the UDISE+ portal. This misalignment is particularly prevalent in states like Goa, Mizoram, West Bengal, and Kerala.

Solution

```
graph LR; Solution --> A[Standardization Support Platform]; Solution --> B[Dynamic insightful and interactive dashboard system]; Solution --> C[Chatbot specially trained based on different standardization schemes and platform data]; Solution --> D[AI powered Standardization checking]; Solution --> E[Dynamic Resource Allocation System (such as teachers, funding)]; Solution --> F[Interactive Stakeholder Engagement Portal];
```

Standardization Support Platform

Dynamic insightful and interactive dashboard system

Chatbot specially trained based on different standardization schemes and platform data

AI powered Standardization checking

Dynamic Resource Allocation System (such as teachers, funding)

Interactive Stakeholder Engagement Portal
